We Are Chainsulting

Chainsulting is a consulting and development company, on the subject of Distributed Ledger Technology (DLT) & Digital Assets. We show ways, opportunities, risks and offer comprehensive solutions. Chainsulting was founded in 2017 by Florian Protschka and Yannik Heinze, who are also managing directors since the beginning.

Meet Our Core Team

Our Mission

Blockchain today provides an incredible amount of opportunities for enterprises. For example, we are witnessing the beginning of a new era in the financial system. Chainsulting wants to give as many companies as possible the chance to participate.

Employee:

- 2 Full Stake Developer
- 1 UX/UI Designer
- 1 Backend Developer
- 1 Frontend Developer
- 2 Marketing Specialist

Yannik Heinze

Yannik is a software developer, IT security specialist and in the blockchain space since many years. Yannik worked in the past, for well known blockchain focused companies. He loves to develop solutions and to advice startups. Yannik studied IT-forensics in Germany.

Florian Protschka

Florian is a capital market and technology specialist. Former projects his company initiated were decorated with e.g. CNN Future Summit and as European technology showcase project. He loves to analyse the opportunities of technologies, digital assets and to advice startups. Florian studied mathematics and economics in Germany.

SOLUTIONS &
ADVISORY

Our Services

- ⚙️ **Software Development**
(Blockchain infrastructures and digital payment solutions)
- ⚙️ **Security Token Offering Advisory**
(Crowdfunding based on digital assets)
- ⚙️ **Software Audit**
(Security Audits for Smart Contracts and Blockchain Infrastructure)

Smart Contract Security Audit

While the rise of blockchain presents a unique opportunity to create smart contracts for digital assets, such as token, smart contract applications come with unique security concerns that have historically led to millions of USD in losses ([The DAO](#) or [Parity Freeze](#)) . To mitigate these risks, it is necessary to conduct smart contract security audits, also to provide transparency to the investors and community.

- ✓ Certificate of Compliance
- ✓ Full Report & Recommendations
- ✓ Automated Vulnerability Testing (Mythril, Slither, Oyente)
- ✓ Manual Security Testing (SWC-Registry, Overflow etc.)

OpSec

Security Audits & Penetration Testing

We provide in-depth security audits of your systems, services, and organization. We perform a deep-dive into your systems to identify weaknesses and potential vulnerabilities that leave your organization at risk.

We will help you harden your company's overall cybersecurity posture by remediating known or newly discovered security vulnerabilities in existing technological infrastructure, software, or organizational protocol.

- ✓ Full Report & Recommendations
- ✓ Automated Vulnerability Testing (Burp Suite, Nessus, ZAP, OWASP)
- ✓ Manual Security Testing

Regulatory Compliance

The regulatory landscape is forever evolving; maintaining regulatory compliance can be a daunting task, especially in highly regulated industries such as finance or healthcare. Let us do the hard work for you and develop a detailed compliance plan custom to your business model and your region's regulatory standards.

Blockchain as a Service (BaaS)

Individuals and businesses are increasingly willing to adapt to blockchain technology. However, the technical complexities and operational overhead involved in creating, configuring and operating the blockchain, and maintaining its infrastructure, often act as deterrents to its mass adoption.

We are offering a viable solution to this problem through the Blockchain-as-a-Service (BaaS) model.

We Support or Partner with Global Leader

Initial Token Offering Solutions & Advisory

ICO/STO

ICOs and STOs are a modern and innovative way for companies to fund their projects through crowdfunding. Clients who trust Chainsulting as an advisory company come from for example Australia, the USA and Europe (Germany, Switzerland, Austria, France, Poland).

Services:

Startup Advisory | Project Management | Funding Strategy

MVP & Product Development

We duly deliver feature-rich products and we do work with tight budgets also. Following hard MVP tactics, we remove any feature that might not be initially required by a large majority of customer base. It allows us to create a working product that can be used by real users, accumulate feedbacks from them, and apply changes to the product without any unnecessary expenses. We strive to make sure that every product we create follows both iterative process, which ensures small and frequent releases every two weeks, and also extremely agile process of introducing changes. We work with scrum and product management tools such as Jira and Trello.

ANDROID/IOS PLATFORMS Java, Flutter, Android SDK, Swift, Objective C

BACKEND PHP, Laravel, Yii/YII2, Ruby on Rails, .NET, Node.js, Web3.JS, Docker, Kubernetes, C++, C#, Solidity

FRONTEND Bootstrap, Javascript, Angular.js, HTML5/CSS3, React.js

DATABASES MySQL, PostgreSQL, MongoDB, Redis, HyperLedger
